

# GitHub Desktop

GitHub Desktop is not a replacement for the functionality of Git, but a tool to enable you and your team to be more productive.

# Core team

@iamwillshepherd

# Goals

- Extend GitHub to your local environment
- Reduce frustration and make Git and GitHub **workflows** more approachable
- Prioritize workflows for beginners and collaborative teams
- Enable users to learn while getting work done

# Why should you contribute?

# It's easy to get started

- Detailed getting started guide
- Our processes are documented
- No guesswork needed when determining how to help; we label issues as *good first issue* and *help-wanted*

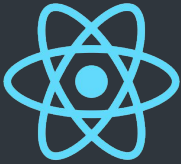

# We value all forms of contributions

- Bug Reports
- Enhancement suggestions
- Testing and QA
- Pull request
- Code review
- Being a part of the discussion

# Built using popular technologies

# Chance to make an impact

- You will improve the work lives of hundreds of thousands of developers
- Be a part of a project that others can learn from

# Work collaboratively

- Our team takes community involvement seriously
- We want to be a good resource for learning
- We try to give timely feedback (typically within a week)
